

SARA System Health Report

Generated: 2025-11-21 21:16:38

Scan Summary

Settings: Logs: System, Application, Security, Setup, Windows PowerShell | Time: Last 30 days | Severity: All (Critical, Errors, Warnings)

Found: 0 Critical, 8 Errors, 4 Warnings (12 total unique events)

AI Analysis

■ **Critical Issues:** There are no critical issues in your scan results. Critical issues are problems that can cause significant damage to your system or data if ignored. They can result in system crashes, data loss, or even make your computer unusable.

■ **Errors to Address:** 1. [Application] .NET Runtime: This error is related to the .NET runtime and may cause some applications to not function properly. It's not a recurring problem, but you can try updating your .NET runtime or your specific application to see if it resolves the issue. 2. [Application] System Restore: This error is related to the system restore feature. It's not a recurring problem, but you may want to create a restore point manually to ensure that you have a good backup in case of a system failure. 3. [System] Microsoft-Windows-TPM-WMI: This error is related to the Trusted Platform Module (TPM) security feature. It's not a recurring problem, but you may want to update the TPM CA/keys to ensure that your system remains secure. 4. [System] Service Control Manager: The Steam Client Service and WLAN Extensibility Module services failed to start. These services are important for the proper functioning of your system. You may want to try restarting the services manually or checking for any updates to the related software. 5. [Application] Application Error: This error is related to the Python application and a specific DLL file. It's not a recurring problem, but you may want to try repairing or reinstalling Python to see if it resolves the issue.

■ **Warnings & Minor Issues:** 1. [System] Microsoft-Windows-DistributedCOM: These warnings are related to COM Server permissions. They are usually safe to ignore, but you may want to check the specific applications and permissions if you encounter any issues. 2. [Application] Microsoft-Windows-CertificateServicesClient-AutoEnrollment: These warnings are related to expiring or expired certificates. You may want to check the specific certificates and renew or replace them if necessary.

■ **Recommendations:** 1. Run the Windows Event Viewer to get more information about the errors and warnings. 2. Try updating the .NET runtime, creating a system restore point, and updating the TPM CA/keys. 3. Restart the Steam Client Service and WLAN Extensibility Module services manually or check for any updates to related software. 4. Repair or reinstall Python and check for any updates to related software or DLL files. 5. Check the specific applications and permissions related to the COM Server warnings. 6. Renew or replace the expiring or expired certificates.

■ **Overall Health Assessment:** The PC has some issues that need attention, but there are no critical problems. The issues include errors related to the .NET runtime, system restore, TPM security, services, and Python application. These issues can cause some applications to not function properly or affect system security. It's

recommended to follow the steps outlined above to address these issues.

Event Log Entries (Summary)

- [2025-11-21 21:09:43] Error - Application
Source: .NET Runtime | Event ID: 1022
.NET Runtime version 4.0.30319.0 - There was a failure initializing profiling API attach infrastructure.
- [2025-11-21 20:59:08] Error - Application
Source: System Restore | Event ID: 8193
Failed to create restore point (Process = C:\Windows\system32\srtasks.exe ExecuteScheduledSPPCreation; Des
